## PROFILE

I'm a Frontend Software Engineer who enjoys building web applications from start to end. I've worked with frameworks such as Django, React and Angular, and I like turning ideas and designs into clean, user-friendly interfaces. I enjoy collaborating with teammates, figuring things out together, and continuously learning along the way. I'm especially motivated by projects that make an impact.

## EDUCATION

### IU Luddy School of Informatics, Computing, and Engineering - IU Indianapolis

Dual B.S in Media Arts and Science & Informatics

Concentration: Web Design and Web Development

Graduated with Highest Distinction | Aug 2020 - Dec 2023

## WORK EXPERIENCE

### Associate Software Engineer

CALRegional – Indianapolis, IN (Hybrid)

Jan 2024 - Present

- Design user interfaces in Figma to improve usability and enhance overall user experience for web applications
- Develop and maintain full-stack web applications using the Django framework
- Build and optimize backend models, views, and APIs to support scalable application features
- Write and maintain automated Python tests to ensure reliability and performance
- Manage cloud-based infrastructure and operations using Google Cloud
- Support customer service initiatives by resolving student technical inquiries and maintaining CRM data in Zoho
- Collaborate in Agile workflows, participating in daily standups and cross-functional planning meetings

### Software Engineer Intern

Infosys – Indianapolis, IN

Jun 2023 - Aug 2023

- Developed and designed a full-stack application using Angular, Spring Boot, and MySQL Server
- Built responsive front-end components using Angular, TypeScript, and Bootstrap
- Developed RESTful APIs using Spring Boot and implemented efficient database queries in MySQL
- Collaborated with fellow interns under mentor guidance to achieve project milestones, incorporating feedback to improve code quality and performance

### Coding Instructor

Code Ninjas – Greenwood, IN

Mar 2022 - Sept 2022

- Taught foundational programming concepts to students using JavaScript, Unity, and Roblox
- Guided students in designing and developing their own interactive games
- Fostered problem-solving skills and computational thinking in a classroom environment
